

A compact all-round solution for sophisticated tasks of transportation

→ 140kg/170kg

The Cargo Master C141 Vario is a compact and flexible version of the C series. Like the CargoMaster C141, it carries up to 140kg and includes a fold-in toe plate that locks as a standard feature. In addition, the handles are adjustable in height and angle which makes the device adaptable to various tasks of transportation. It can further be stowed in a small space in the boot of the car.

The most impressive advantages of the CargoMaster C141 Vario:

- easy handling
- low weight of approximately 20.5kg (plus batteries)
- small size of 106x45x30cm
- adjustable grips in height and angle

Agile: Narrow or winding stairs are for the most part no problem.

Outdoors: CargoMaster C141 Vario is also a reliable partner outside.

Variable: Due to the variable climbing speed of 8 up to 30 steps per minute, and the grips adjustable in height and angle, the C141 Vario can adapt to virtually any type of condition.

Lifting capacity: 140kg / 170kg
 Climbing speed: 8 – 30 steps / minute (adjustable)
 Capacity: 300-500 steps with one battery charge (depending on the load)

In the name of progress we reserve the right for technical changes.

Compact: With its handles that can be pushed into the frame and the thus comparatively small size of the CargoMaster C141 Vario, it finds room in even small vehicles.

Universal use: CargoMaster can be used on narrow stair cases as well as on stairs with coverings otherwise easily damaged.

THE FLEXIBLE CLIMBER

Flexible use

The Cargo Master equipped with the c-system can be used in a versatile and flexible way. Nearly any kind of goods can be transported with it. Extensive accessories solve even difficult problems of transportation. Customised versions of the CargoMaster are also available on demand.

Add-ons: Extensive accessories for special tasks of transportation are available.

Ideal for narrow

CargoMaster effortlessly "walks" up stairs. Even narrow stair cases and winding stairs are with a little practice on your part no problem for the CargoMaster. The same is true for its use on all kinds of surfaces and floor coverings. The CargoMaster masters virtually any kind of stairs and soon pays off in daily use.

Effortless, safe, and easy to handle

On level ground CargoMaster works like a regular hand trolley. The batteries necessary to climb stairs are charged with the charger that comes as part of the standard delivery package. In addition all devices can be charged in the car with a special charging cable (accessory). That way the CargoMaster is ready to use all day long. For extreme continuous use a second set of batteries is available.

No problems: To charge your batteries you simply connect them to the charger.

Technology		
lifting capacity	kg	140 / 170
climbing speed	(steps/min)	8-30
