

Your strong partner

Effortless transportation even with extremely heavy loads

CargoMaster
C400

For the transportation of extremely heavy loads most often several persons are needed. This type of work particularly strains a person's back and joints. Therefore, rather

Since the load fork can be moved up and down, the center of gravity can be adjusted optimally.

often, there is a shortage of personnel due to back problems and joint injuries.

The CargoMaster renders it possible for one person alone to transport loads up to 400 kg, which makes the device your ideal partner. Whether the loads have to be transported up and down stairs or on level ground does not make any difference. Even the loading and unloading of vehicles or shelves is easily possible with the CargoMaster, thanks to its integrated lift.

The center of gravity can be optimally adjusted to the load to be transported due to the lowering and rising of the electrically adjustable load fork. This facilitates transportation on stairs as well as on level ground enormously.

Loading and unloading of vehicles is facilitated tremendously by the integrated lift.

Manual Handling
SOLUTIONS

- safe transportation of heavy goods up and down stairs up to 400 kg
- continuously adjustable climbing speed
- no damage of goods or stairs
- electrical adjustment of the load fork to adjust to the center of gravity
- integrated lift to facilitate loading and unloading
- puncture-proof tyres
- considerable relief for the personnel

CE The CargoMaster C400 corresponds to the relevant guidelines for machinery 2006/42/EG, appendix 1, of the European Union.

c400_gb_07_2011

The C400's climbing mechanism provides safe transportation on virtually any type of stairs inside as well as outside. The safety brakes automatically brake at each step's edge.

The CargoMaster's tyres are puncture-proof, even though they are under constant stress.

Electricity is provided by the battery pack that can be charged by a charger plugged into a wall outlet. One battery charge is sufficient for 8 – 15 levels, depending on the load.

Part of the delivery package is the stair climber C400 with mounted lift, lashing strap, battery pack and the charger. Special accessories make the C400 your ideal partner in almost all situations of transportation.

Accessories of the CargoMaster C400

- Foldable grips
- Tilting aid
- Stairs for heavy lifting
- Charging cable for the car
- Rack for the toe plate
- Lay-on rack to transport high goods
- Lay-on device for round containers
- Back wall to protect the goods

Technical data

Maximum loading capacity	400 kg
Climbing speed	3 - 8 steps per minute (continually adjustable)
Batteries	2 x 12 V / 5,0 Ah
Capacity of batteries	8 - 15 levels (depending on the load)
Max. lifting load fork	700 mm
Max. lowering load fork	210 mm
Weight of the device	74 kg
Weight of the battery pack	4 kg
Total weight	78 kg
