max. Loading: 100 kg

Art.-Nr.: 100021

without figure

Construction especially for white goods

increased climbing height 5mm Art.-Nr.: 100263  
Bigger brake wheels Art.-Nr.: 100296

In white goods the center of mass is pretty low. Therefore the stairclimber has to be handled in low position. To optimize the handling on the stair the construction for white goods is recommendable for the predominant transport of white goods.

Ideal addition on this: support for white goods  
Art.-Nr.: 100201 (see figure page 1)
